

Install Package Description

D. Billet
9-13-2012

Layout of the Install Package

The install package is divided into the following 4 folders:

- 1) Download Programs – this folder contains any programs needed to download software/firmware to the printer.
- 2) Instructions – this folder contains instructions on how to install new code, install new Windows drivers, download firmware or how to make any other changes to the software or printer.
- 3) PC Software – this folder contains any of the software or drivers that run on the PC.
- 4) Printer Software – this folder contains any of the software/firmware that runs in the printer.

Instructions to Follow

- 1) T1000_Software_Config_9-13-2012.pdf – this file lists the latest versions of all the software/firmware for the T1000. Highlighted entries will be updated in the following instructions.
- 2) Install_Instructions_Firmware_9-13-2012.pdf – this file contains instructions on how to update the latest firmware.
- 3) Install_Instructions_2.0.1.56_9-13-2012.pdf – this file contains instructions on how to update the GUI, other changes needed for the software or changes to the printer itself. The 2.0.1.56 revision of the GUI requires the 3492 upgrades to me made before this new version is installed!
